-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3653

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 10 it is unclear if the movement of the dispenser between first and second positions is the same as the movement of the dispenser between open and closed positions. It appears these two movements are actually the same movement and the recitation of movement between first and second positions in claim 10 is redundant.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 through 5 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Fritz et al '082.

Note the dispenser 14 moveable between first and second positions (as indicated by arrows 16) to allow viewing a removal of products at drawer 13. Note also the inclined surface 7 provide by the insert (see Fig. 4) within the container.

5. Claims 1, 2, 5, 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Brunner.

Art Unit: 3653

Brunner teaches a container provide with a dispenser 14 moveable between first and second positions to permit viewing and removal of products when at one of the positions. Upon removal of a product the remainder of the products are displaced downward along an inclined surface 34 which is integrally formed as part of the container.

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fritz et al '082.

Fritz et al '082 as interpreted above in paragraph 4. Fritz et al '082 fails to teach the specific product dispensed (i.e. cloth wipers). The particular product dispensed is considered an obvious matter of choice for one of ordinary skill in the art as the Fritz et al device is cable of containing any desired product for dispensing.

8. Claims 9 through 12 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fritz et al '082 in view of Tassoni.

Fritz et al '082 as interpreted above in paragraph 4 teaches everything except a window capable of displaying the product within the container and the specific product dispensed being cloth wipers.

Art Unit: 3653

Tassoni teaches providing such a dispensing container with a window 11 to provide a view inside the container to permit viewing the availability of the product within the container.

In view of the teachings of Tassoni, it would have been obvious to one of ordinary skill in the art to provide a window in the container of Fritz et al '082 to allow a user to more easily ascertain the availability of product within the container. Further, the specific product dispensed being a cloth wiper is considered an obvious matter of choice for one of ordinary skill in the art as related above in paragraph 7.

9. Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
